About

As a frontend engineer, I strive to build, be challenged, and learn from those around me. I've contributed to products from conception to completion, been the sole front-end developer at a startup, and worked on large teams full of talented experts. In my current position at TED, I've been building alongside a team I have the privilege to learn from daily. I've been fortunate to be empowered to build great products, and learn from a team diverse in thought and perspective.

Skills

React, JavaScript, TypeScript, CSS3, HTML5, Gatsby, GraphQL, NextJS, Responsive web development, multivariate and a/b testing, working in interactive media for large audiences, UI design competency.

Work

TED Conferences
2016 - Now
Senior Frontend Engineer

Developed the front-end of the most visited pages on ted.com including the home, search, and video pages in close collaboration with design, product, and analytics.

Helped build the two latest video pages, the latest using NextJS, GraphQL, and TypeScript.

Conceived and developed prototype features resulting in 8% increase in inbound traffic from social sharing of talks.

Oversaw multivariate and a/b testing initiatives.

Redgage
2010 - 2016
Frontend developer and designer

Coded and designed interfaces for web, iOS, and Android in a distributed team. Managed all phases of website and app creation from conception to release.

Freelance
2008-2010
Designer and Developer

Education

Broward College
June 2009
Associates of Arts in Art & Design

Projects

Mallorie Potaznick, LMHC ↗

Statically generated site for my wife's therapy practice designed and developed by yours truly. Built with Gatsby, theme-ui, and Netlify CMS.

react-native-swipeout ↗

Open-source React Native component used by Shopify, Ant Design, Jitsi Meet, and contributed to by the core React Native development team.
